

I oppose further consolidation of media. Global conglomerates have already gotten a stranglehold on the markets. It is a no-brainer to retain current ownership rules on June 2nd. We should be talking about strengthening regulations, not relaxing them. News broadcasts are just one area affected. Objective information benefits everyone and is an essential tool in a democracy.

We send our troops all over the globe in the name of democracy while our own disintegrates behind a facade of economics and patriotism.
